

a2

3. A plant stand as in claim 2, further comprising at least three additional ridges for attaching said at least three additional rings to said at least one vertical support.

a3

5. A plant stand as in claim 4, wherein said at least three additional vertical supports have at least three additional indentations to removably communicate with said at least one ring, and said at least three additional rings.

a4

9. A plant stand, comprising:

at least one vertical support communicating in a removable manner with the earth;

an indentation on said at least one vertical support;

at least one ring attached to said at least one vertical support; and

    a ridge on said at least one ring, said ridge in communication with said indentation on said at least one vertical support.

10. The plant stand of claim 9, wherein said ridge rotates within said indentation.

11. The plant stand of claim 9, wherein said ridge rotates within said indentation between a locked and unlocked position.
